

[Step by step installation guide for the Bundle download](#)

Requirements:

- * Java Development Kit 1.5 or later,
- * A compatible internet browser: Internet Explorer 7+, Firefox 3+, Safari 3+

Installation:

1- Download the latest Bundle released on the website.

2- Extract the file in a chosen folder.

3- Launch the *icescrum2.bat* file for Windows or *icescrum2.sh* for Unix/Linux systems (don't forget to give execution rights, you will need right to open 8080 port).

In your web browser, type the URL: [http://\[host_address\]/\[web-app_name\]](http://[host_address]/[web-app_name]) (for example, <http://localhost:8080/icescrum2>).

4 You can now start using IceScrum2! You must begin by register yourself.

Click on the button “Registration”, fill the form and validate.

5- Log in your freshly created account, and give it a try.

(You can start with an empty project or you can begin with loading the "icescrum2 template project data" that you can find on icescrum website)
